Subject: MMTU SERVER STATUS

Hi Sir,

MMTU server has two HDD (2 TB Both).

One hard disk of MMTU server was down ,showing no disk in system.

After checked all things I found that HDD is faulty and no more.

I have checked warranty status for that but HDD is out of warranty. I am attaching snapshot for that.

(Received by Himmanshu Kharde) Amit

Received 2 Nos Non working SATA 2TB HDD

SLNo S240RG153 & Z1E1LC46
